Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: the examiner informed the applicant that the proposed after-final amendments to the above claims would render the claims allowable over the prior art of record. The amendments also raised new issues in the claims that would require future search and consideration in order to determine patentability over the prior art as a whole. In particular, the limitations that raised new issues include: a monolith waveguide, a planar waveguide core that is in a fixed position and flush with the lower cladding, and the overcoat layer engaging the lower cladding.
